Your local Compressed Air and
Industrial Gasses Provider

dvsgroup.com.au

WA's Compressed Air Specialists

Direct Varied Solutions (DVS Group) supply and service a vast range of rotary compressors, reciprocating compressors, nitrogen generators, vacuum and blower packages.

We possess over 40 years experience with mining, industrial and production sectors. You can be confident you are choosing a company that offers comprehensive service on your compressed air and mechanical requirements.

From initial consultation and turnkey design phase, to optimised installation, commissioning and continuous after-sales support. The team at DVS takes great pride in our values and skillsets to provide you with service levels that meet and exceed your expectations.

We look forward to working with you.

Lloyd De Swardt

Managing Director

About Our Servicing

We service all brands of air compressors. DVS Group's Compressed Air System service technicians are factory trained and available 24/7.

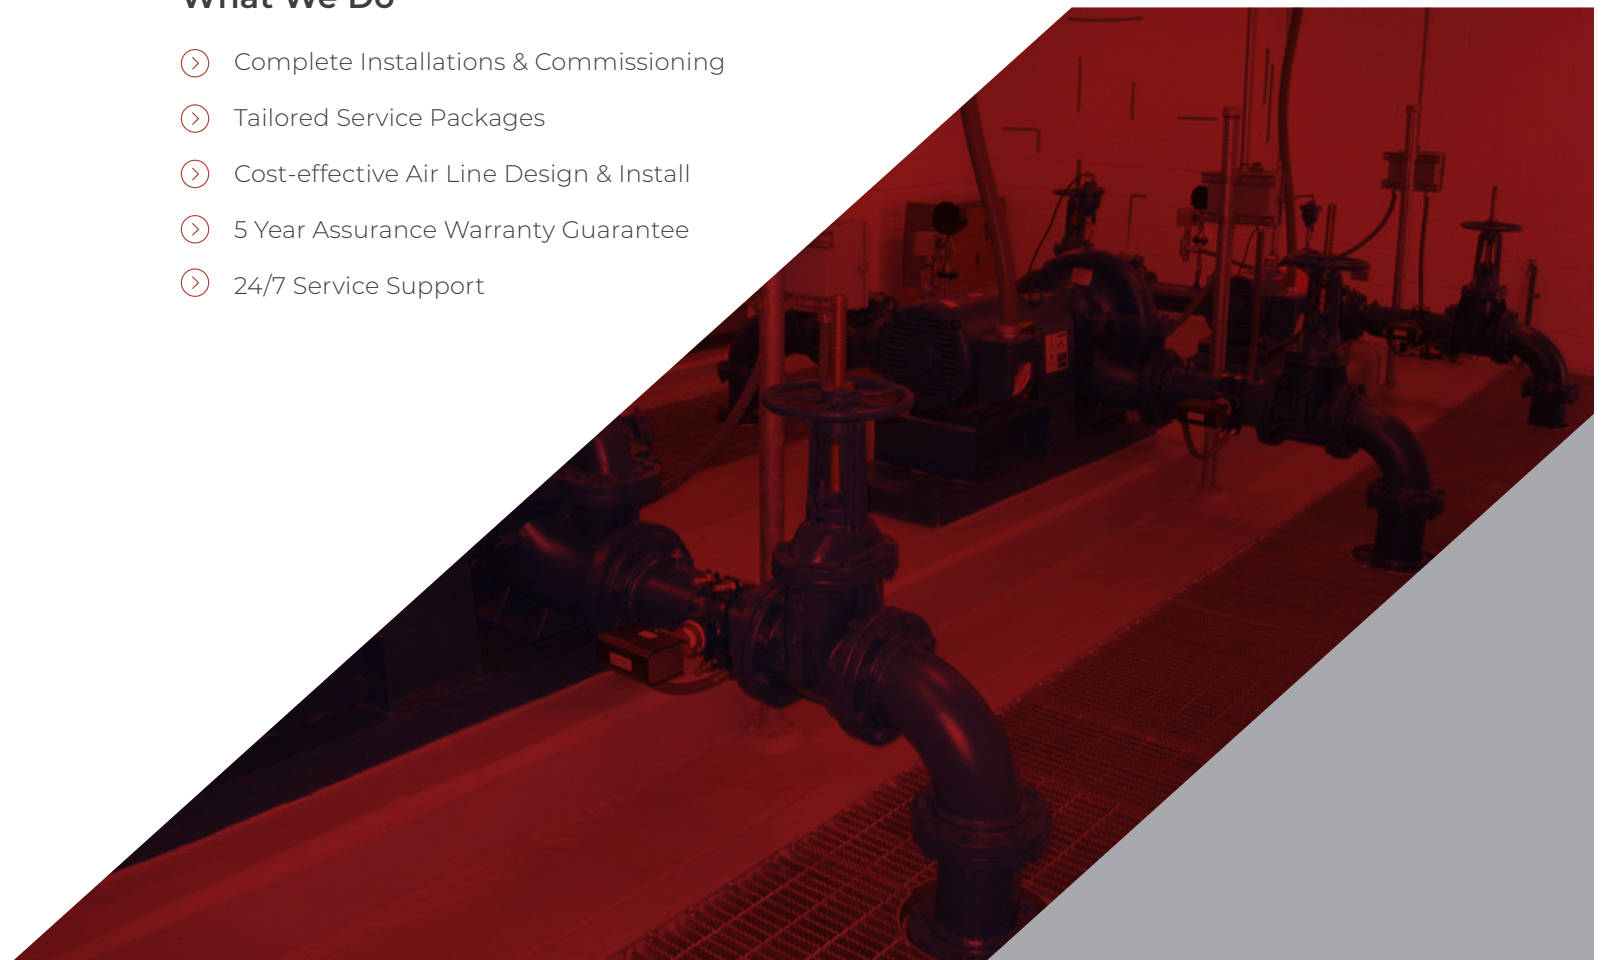

Regardless of the industry you operate in, it is critical that your equipment performs at optimal levels. DVS Group offers three levels of Service Plans for screw compressors, allowing you to tailor fit your requirements to your needs.

Our service packages are designed to offer complete peace of mind that your compressed air system is reliable, safe and energy efficient at all levels of application.

Your Team for Air Compressor Servicing & Maintenance in Perth, WA.

¹ In Metropolitan area. ² Including ancillary equipment and recommendations. ³ One free callout per year for Direct Cover and four free callouts per year for Varied Cover. ⁴ One per compressor. ⁵ One free Energy/Safety Air Audit for Direct Cover and two for Varied and Warranty Cover.

Inspection & Registration

DVS Group performs pressure vessel registrations, testing and inspections across Western Australia, ensuring you meet your local WorkSafe requirements.

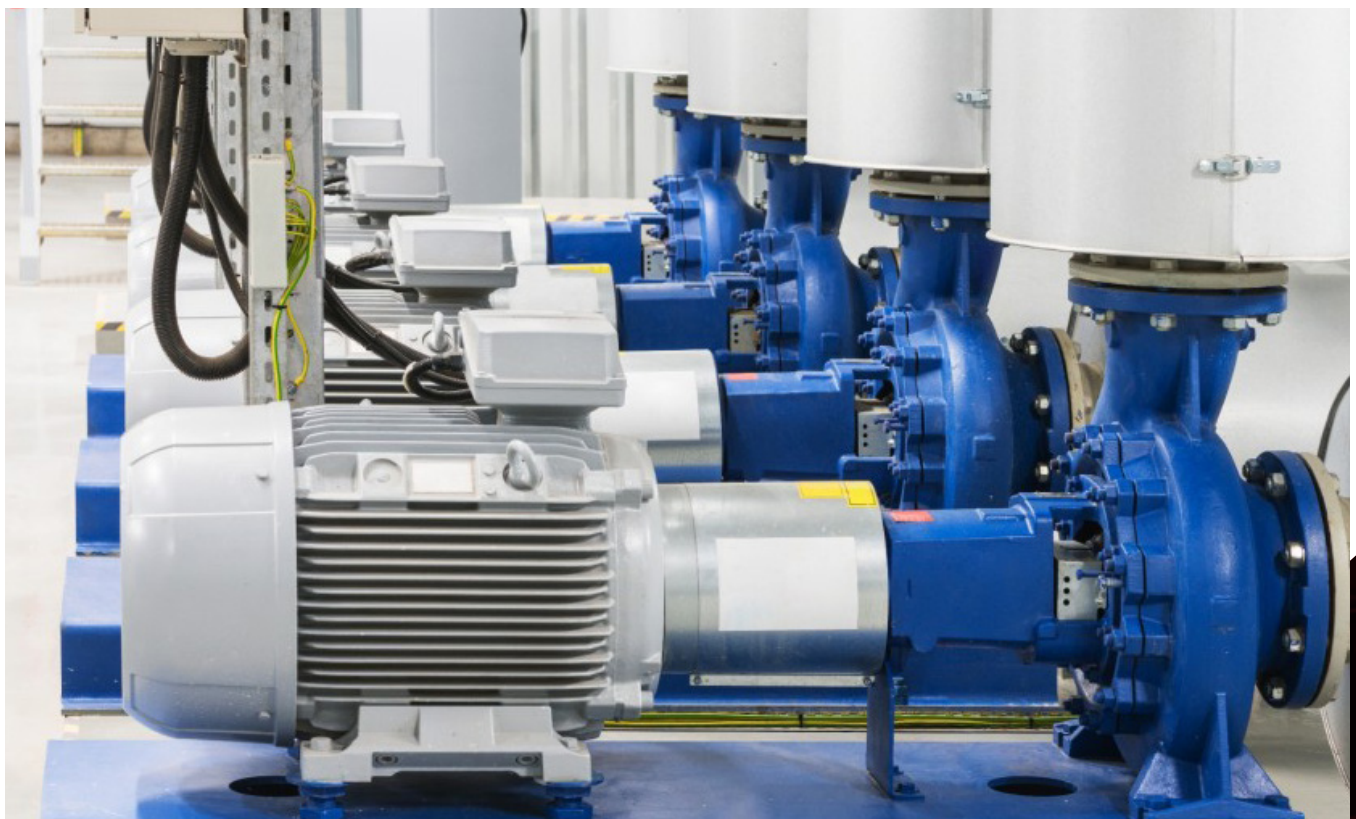

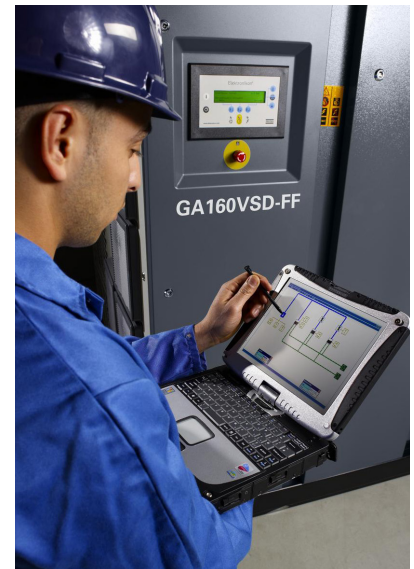

Pressure Vessels (Air Receivers) used in the workplace can be potentially dangerous, with the risk of causing property damage, injury and even fatality if not suitably monitored and maintained. It is therefore essential to properly install, service and inspect compressed air receivers to ensure that all equipment complies with the relevant Standards and Regulations.

Compliance Monitoring

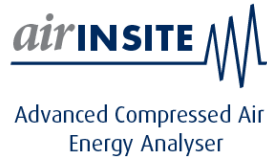

Our technicians perform registration and routine inspection of pressure vessels to meet WorkSafe WA requirements and AS/NZS 3788:2006 safety policies.

Audit Certification

DVS Group issues PRV NATA Certifications post-audit, so you can be assured of safety and quality control in accordance with Western Australian Standards.

Our Partners

Air Line **Installation**

Our turnkey Packages suit all budgets. Our strong focus on safety and quality allows us to complete projects on-time, safely and problem-free.

We provide products and service for large-scale projects. DVS Group is an excellent single source provider for all components of your airline system, with comprehensive installation and servicing packages including the following features for complete ease of mind.

- **System Design**
Determine system requirement, equipment selection and air system layout

**Increase
efficiency
with
proactive
service.**

Air Line System Management

DVS Group gives you the peace of mind and knowledge that ensures smarter and more efficient production, at the same time providing tangible benefits to your bottom line and commercial outcomes. For more information about our process from initial consultation to ongoing maintenance, please contact us.

Consultation

Our qualified consultants draw on years of industry and technical knowledge to recommend the most suitable compressed air setup to suit your application requirements.

Architecture

Our design team works with you to create a fully customised As-Built Air Line Drawing. This is continually refined throughout the consultation and design process.

Installation

Our pipeline install team are highly skilled and experienced technicians, taking pride in fitting systems that are tidy, efficient and productive.

Ongoing Service

Our post-installation team is available to conduct regular maintenance & compressed air quality checks to ensure your system remains leak-free with quality air.

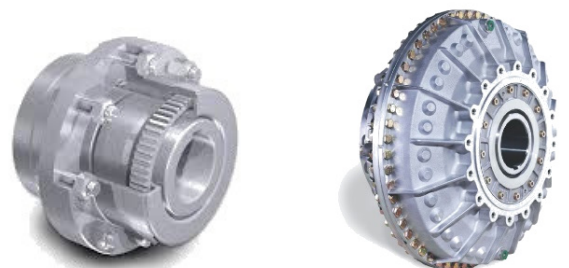

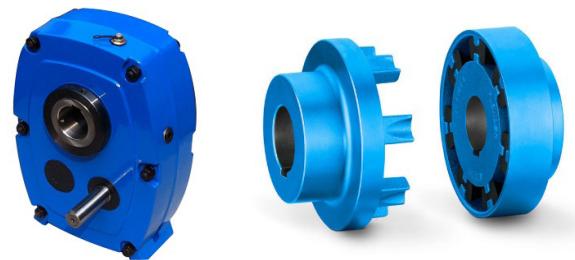

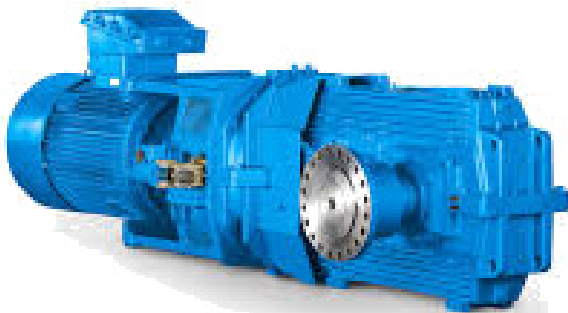

Our Gearbox Program

Customised gearboxes for modern day use.

DVS Group produces custom designed gearboxes for the commercial, marine, defense and energy industries. The applications our gearboxes are used in vary from high-speed power transmission to precision positioning devices. In addition to high-quality gears and gearboxes, we provide holistic services in prototype-to-production and production support, gearbox inspection and automation support.

Design & Selection

Our gearbox design solutions include custom engineering upgrades, or the selection of suitable gearboxes to suit your commercial needs.

We provide **long-term** packaging.

From shipping your equipment interstate or overseas, or to protect against the elements, we provide high-quality shrink wrapping services.

Shrink Wrapping

Our commercial shrink wrapping services include:

- Shrink Film (210um)
- Inspection covers
- Rain covers
- Desiccants for moisture control.
